## WHITEBOARD DELUXE 130 BOARD FOR DIFFERENT FINGERTOUCH PROJECTORS

MANUALLY HEIGHT ADJUSTABLE, FOR WALL MOUNTING WITH COUNTER-WEIGHTS AND TWO SIDE WINGS

### PRODUCT

Manually height adjustable interactive board systems

Our manually height adjustable whiteboard deluxe 130 boards are wall mounted. Thanks to the counterweights, the whiteboard can be easily adjusted in height. The height adjustment consists of 2 aluminum profiles, which come standard with 2.60 m height.

The projection surface is matt white, writable with whiteboard markers and can be wiped dry. In addition, the center area of the whiteboard is magnetic. The black anodized frame provides a good contrast and has safety corner caps.

The extra-wide aluminum design projector arm ensures maximum stability. A hidden and proper cable routing inside the projector arm does not hang cables down the whiteboard.

Our side wings are writable on both sides with whiteboard markers, dry wipeable and magnetic. The side wings are delivered including hinges and top and bottom bar for stable connection of the wings with the frame.

### Accessories

Active speaker Boxaudio

2 galvanized adjustable wall mounting brackets
