MOTORIZED HEIGHT ADJUSTMENT - BARRIER-FREE - "LECTURER'S DESK 1"

ELEGANT, ROBUST LECTURER'S DESK WITH MOTORIZED HEIGHT ADJUSTMENT

PRODUCT

Whether universities, technical colleges or local authorities, lecterns are used everywhere. As presentations and lectures are becoming more and more important these days, it is all the more important that the basic requirements for the speaker are right and that as much comfort as possible is provided. In order to adapt the lectern ergonomically to the height of each speaker, a stepless, motorized height adjustment of 30 cm is possible.

The elegant lectern has a base cabinet for accommodating 19" technology (max. 12U). Various technical devices can be accommodated here. The base cabinet can be locked for the safety of the technical equipment. The lower front panel can be removed for inspection.

The basic equipment includes a connection panel (HDMI, USB/LAN, 3.5 jack stereo and 230V socket) in the desk top on the speaker's side.

For flexible use, the lectern stands on 4 smooth-running castors, 2 of which are lockable (available with adjustable feet on request). The stepless, motorized height adjustment of 30 cm can be operated at the touch of a button.

(Standard: body RAL7016 anthracite gray, front panel RAL 9007 gray aluminum, base plate: RAL 9005 jet black, desk top: willow beech H1910 ST9)
